**Listing of Claims**

The following listing of claims will replace all prior versions, and listings, of claims in the subject application:

1. (currently amended) A method for automatically printing, ~~without a need for user action;~~ a hard copy of transaction information relating to a transaction conducted electronically between a user-side terminal and a supplier-side computer, said method comprising the steps of:
  - (a) automatically identifying a selected aspect of information regarding the electronic transaction, said automatically identified aspect of information including at least one of a confirmation number, password and invoice information concerning electronic commerce ~~with a selected aspect;~~
  - (b) automatically generating, without a need for user action specifying, a print request by extracting electronic commerce information corresponding to the automatically identified information of step (a); and
  - (c) automatically sending said print request to a user-side printing apparatus ~~at said user-side;~~ and ~~(d) printing to have the user-side printing apparatus print the transaction information regarding said electronic transaction, without the user specifying the print job in response to said print request.~~
2. (original) The automatic printing method of claim 1 further comprising the step of:  
storing said information regarding said electronic transaction in a storage medium.
3. (previously presented) The method of claim 1 further comprising the steps of:

Dkt. No. 2271/61807

notifying a control apparatus of communication between the user-side and the supplier-side;

monitoring the communication;

automatically recognizing by said control apparatus, without reliance on user action, the information including said at least one of a confirmation number, password and invoice information concerning electronic commerce; and

generating a print request in response to recognizing the information including said at least one of a confirmation number, password and invoice information concerning electronic commerce.

4. (original) The method for automatically printing of claim 3 further comprising the step of:

storing said information regarding said electronic transaction in a storage medium.

5. (previously presented) The method of claim 1, wherein step (a) occurs at the user-side.

6. (currently amended) A method for automatically printing, ~~without a need for user action~~, a hard copy of transaction information relating to a transaction conducted electronically between a user-side terminal and a supplier side computer, said method comprising the steps of:

(a) automatically identifying a selected aspect of information regarding the electronic transaction, said automatically identified aspect of information including at least one of a confirmation number, password and invoice information concerning electronic commerce ~~with a selected aspect~~;

(b) automatically generating a print request by extracting electronic commerce information corresponding to the automatically identified information of step (a); and

(c) automatically sending said print request to a user-side printing apparatus ~~at said user side~~ via a local area network; ~~and (d) printing to have the user-side printing apparatus print the transaction information regarding said electronic transaction, without the user specifying the print job in response to said print request.~~

7. (original) The automatic printing method of claim 5 further comprising the step of: storing said information regarding said electronic transaction in a storage medium.

8. (previously presented) The method of claim 5 further comprising the steps of: notifying a control apparatus of communication between the user-side and the supplier-side;

monitoring the communication;

automatically recognizing, without reliance on user action, the information including said at least one of a confirmation number, password and invoice information concerning electronic commerce; and

generating a print request in response to recognizing the information including said at least one of a confirmation number, password and invoice information concerning electronic commerce.

9. (original) The automatic printing method of claim 7 further comprising the step of: storing said information regarding said electronic transaction in a storage medium.
